

Logging into SharePoint Sites

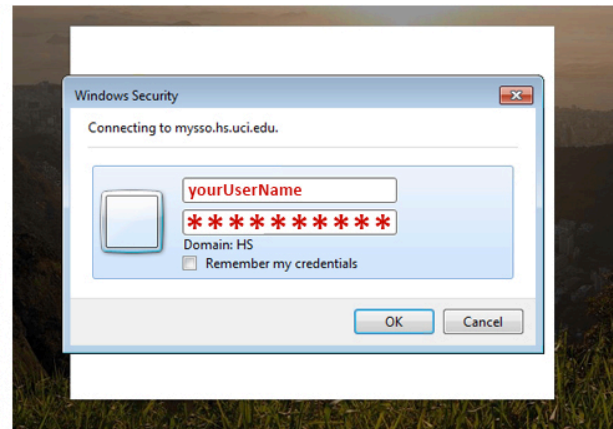

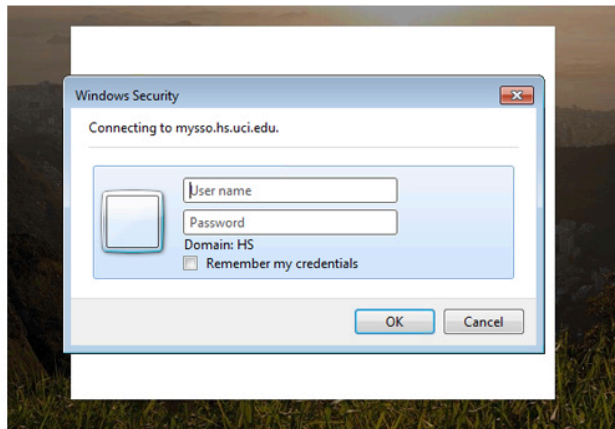

SharePoint Online requires you to sign in first.

If you have not previously logged into SharePoint Online, you will be prompted for your User Net ID.

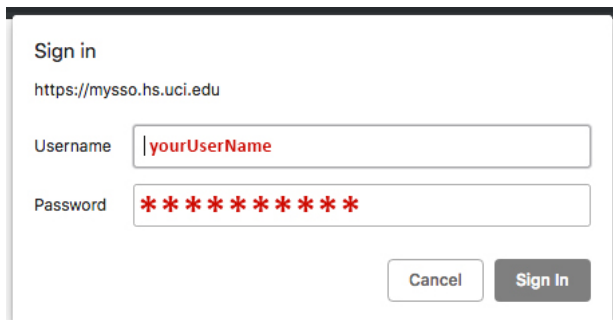

Example: pant eater@hs.uci.edu

Windows PC users might also have to log in a second time:

Chrome and Safari Users:

At home users will have to install Duo prior to signing in.

More information on how to install [Duo](#) »

Once logged in your SharePoint Online site will look somewhat different. All previous features are still available.

Site Settings New Look

- Site Actions > Site Settings has been replaced with the gear icon:
