

## How to set your SharePoint site up for mobile phone viewing

SharePoint Online sites are set up automatically to be mobile friendly.

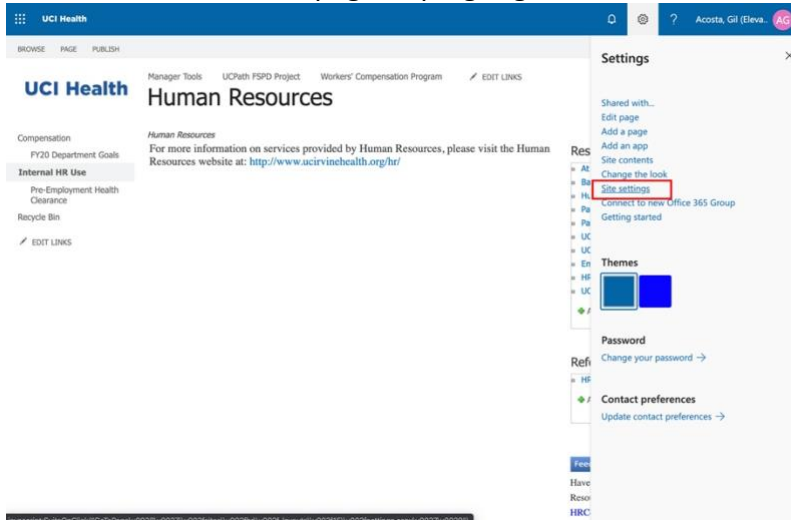

This view might not meet your department's needs.

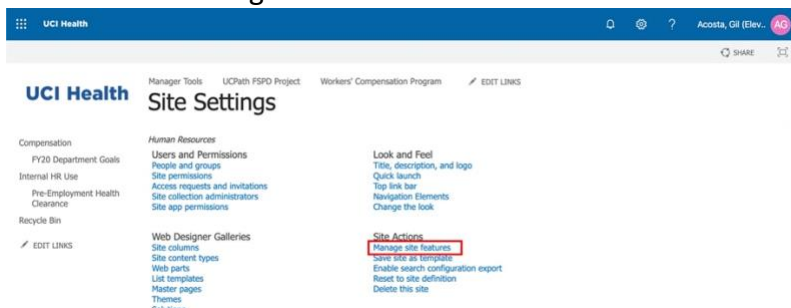

To display your SharePoint site with the traditional web view:

*\*Only SharePoint site admin's/owners can make this change.*

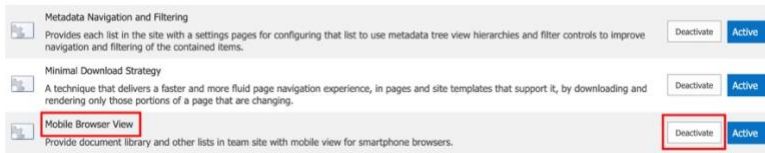

### 1. Go to the home page, top right gear icon > site setting

### 2. Then Manage Site Features

### 3. Deactivate Mobile Browser View

### 4. Confirm your update

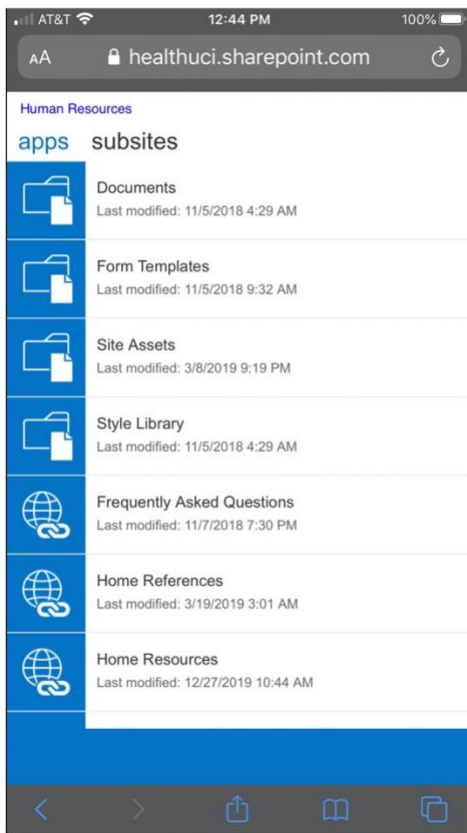

#### \*Mobile View Activated

Your site will now display on mobile devices (phones) that the desktop displays. If your mobile device does not display the correct view, refresh the browser.

### Before Deactivation

### After Deactivation
